National Land & Range Judging Contest

The National Land and Range Judging Contest will be held May 3-5, 2011, in Oklahoma City. This will be the 60th annual contest held in Oklahoma City. In recent years the contest has drawn close to 1,000 4-H and FFA members and coaches from 35 states to the event.

This is the largest fundraising event for the Oklahoma Chapter of SWCS and members are encouraged to assist with the selling of t-shirts, hats, and other selected items. These funds are used to support this event, our scholarships, no-till conference, Governor's Water Conference, and other conservation activities in Oklahoma.

The Oklahoma Chapter of SWCS is proud to join the Oklahoma Association of Conservation Districts to be a co-sponsor for such a wonderful educational event and a very positive contest.

Annual Conference June 9 - 10

The 2011 Annual Conference of the Oklahoma Chapter of SWCS will be held June 9-10, 2011, in Norman. The theme of the conference is "Interagency - Intersectoral Partnerships in Natural Resource Conservation."

The focus for this year's meeting is to present attendees and the conservation agencies and sectors an opportunity to learn about past and on-going conservation efforts in our great state. Such an overview will afford participants an opportunity to learn about conservation efforts by others within the state so that they can leverage resources through collaboration and avoid duplicating efforts.

Norman, OK, is the perfect place for people interested about conservation to convene, learn, and explore ways to collaborate in order to efficiently achieve each agency and sector conservation goals. We invite you to join us and contribute your knowledge and experience.

SWCS 66th Annual Conference 2011 Conservation Science and Policy: Global Perspectives & Applications

Washington D.C. July 17-20, 2011

Conservation is a complex endeavor. It involves multiple actors and disciplines, requiring learning and adapting. No matter where you live, work or study, your knowledge and experiences contribute to the science and art of conservation.

Our focus for this year's meeting is exploring ways to improve the linkages among conservation science, policy and application at local, national, and international scales. The conference will provide participants an opportunity to teach skills, learn techniques, compare successes, and improve understanding.

Washington, DC, is the perfect place for people to convene and explore ways to strengthen conservation practices and policies at home and throughout the world. We invite you to join us and contribute your knowledge and experience.

Welcome new members: Becca Dominick
