- Technically I've been a member for a year and still have no idea what this chapter is all about. There was one meeting at the end of last semester and one at the end of the most recent semester to elect new officers and both times I didn't feel like they accomplished anything, I didn't even know who the officers were last time.
7/10/2012 10:53 PM [View Responses](#)
- as a farmer I could use mentoring myself such as the Noble Foundation provides, however, they are not permitted to travel more than one hundred miles radius from their headquarters leaving Western OK out when we may need conservation more than other locations in OK due to climate/drought, wind, and lack of educational outreach.

- My efforts are to farm with nature (ecologically) and share my farm with others (educate through outreach and demonstration) often without adequate resources or help from others. Collaboration and help would be an outstanding development!

We have gotten away from involving the family of SWCS members and went more to a technical meeting for our annual conference. I think we need to go back the way we did it several years ago. During a member poll in El Reno family was the number one concern for annual meeting yet nothing in the past few years has been done to involve them. We always set it up for when school was out so everyone could be involved. Let's go back to the way we use to have our meetings and also not start so early on the first day because some people have several hours to drive.
